

Single Airlock Biometric Turnstile EAG58493-201

Biometric Security Turnstile

The airlock style turnstile is designed to address the complex issue of buddy passing. It can be installed internally or externally. The turnstile provides secure anti pass back tracking of people through the turnstile via the airlock/interlock. Additional sensing outputs provide a range of tracking signals designed for use with biometric cameras and readers.

Applications

- Contractor Sites
- M.O.D Sites
- Border Security
- Rapid deployment

Specification

- Only one biometric reader for bidirectional operation
- Directional lights confirm the direction of travel once the biometric reader is used
- Complete rotor sensing tracking provides user identity and direction of egress
- Throughput operation 2-3 secs
- Provides fast, unmanned monitoring solution
- 230v 6amp supply
- 120° Straight bar rotor
- Fail unlocked on power failure only
- Finish powder coated in any standard RAL colour

Additional Options

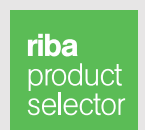

- System integration with access control pre-wired
- Standard rotation mode
- Escort mode
- Choice of biometrics available
- Works with most biometric systems
